WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/EP2004/051308

_	Box	No. I Basis of the opinion					
1.	. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was field, unless otherwise indicated under this item.						
	☐ This opinion has been established on the basis of a translation from the original language into the following language , which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).						
2.	2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:						
	a. type of material:						
		a sequence listing					
		table(s) related to the sequence listing					
	b. for	mat of material:					
		in written format					
		in computer readable form					
	c. tim	e of filing/furnishing:					
		contained in the international application as filed.					
		filed together with the international application in computer readable form.					
		furnished subsequently to this Authority for the purposes of search.					
3.	ŀ	n addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.					
4.	Addit	ional comments:					

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/EP2004/051308

_	Во	x No. II	Priority				
1.	The following document has not been furnished:						
		⋈	copy of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(a)).				
			translation of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(b)).				
			quently it has not been possible to consider the validity of the priority claim. This opinion has neless been established on the assumption that the relevant date is the claimed priority date.				
2.		has be	pinion has been established as if no priority had been claimed due to the fact that the priority claim en found invalid (Rules 43 <i>bis</i> .1 and 64.1). Thus for the purposes of this opinion, the international ate indicated above is considered to be the relevant date.				
3.	Add	ditional o	bservations, if necessary:				

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/EP2004/051308

Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability							
The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:							
	the entire international application,						
⊠	claims Nos. 1-12 and 14						
bec	ause:						
⊠	the said international application, or the said claims Nos. 1-9 and 14 with regard to industrial applicability relate to the following subject matter which does not require an international preliminary examination (specify):						
	see separate sheet						
	the description, claims or drawings (indicate particular elements below) or said claims Nos. are so unclear that no meaningful opinion could be formed (specify):						
	the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.						
\boxtimes	no international search report has been established for the whole application or for said claims Nos. 10-12						
	the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the Administrative Instructions in that:						
	the written form		has not been furnished				
			does not comply with the standard				
	the computer readable form		has not been furnished				
			does not comply with the standard				
	the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with the technical requirements provided for in Annex C-bis of the Administrative Instructions.						
П	See senarate sheet for further of	detail	is.				

Box No. V Reasoned statement under Rule 43*bis.*1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

ims 1-15

Industrial applicability (IA)

Yes: Claims

10-12 and 15

No: Claims

1-9 and 14 (see separate sheet)

2. Citations and explanations

see separate sheet

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

III.1 Claims 1-9 and 14 relate to subject-matter considered by this authority to be covered by the provisions of Rule 67.1(iv)PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(I)PCT).

III.2 The formulation "as disclosed in WO0248144, WO03014115, WO03014116 or WO03014117 or analogously or similarly thereto" (referring to claims 10-12) violates the requirements of Article 6 PCT. These references to other documents cannot be regarded as technical features. The technical features concerned should be incorporated from the description into the claims.

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

The applicant's attention is drawn to the fact that the present opinion expressed as to novelty, inventive step and industrial applicability refers only to matter for which an international search report has been drawn up (see section III.1).

V.1 Article 33(4) PCT

The subject-matter of claims 1-9 and 14 involves compositions or substances in a method of treatment of the human/animal body. For the assessment of these claims on the question whether they are industrially applicable, no unitary criteria exist in the PCT Contracting states. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognise the subject-matter of claims related to the use of a compound in medical treatment as industrially applicable. However, the EPO may allow claims related to a known compound in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

V.2. The following documents are referred to in this communication:

- D1: WO 03 014116 A (ERGUEDEN JENS-KERIM ;FLUBACHER DIETMAR (DE); STOLTEFUSS JURGEN (DE) 20 February 2003 (2003-02-20)
- D2: WO 02 48144 A (ERGUEDEN JENS-KERIM ;FLUBACHER DIETMAR (DE); NIEWOEHNER ULRICH (DE) 20 June 2002 (2002-06-20)
- D3: WO 03 051877 A (PERNERSTORFER JOSEF; BAYER AG (DE); BURKHARDT NILS (DE); NIEWOEHNE) 26 June 2003 (2003-06-26)

V.3 Article 33(3) PCT

D1 (page 1, paragraph 2; claim 4, examples 1-92) and, similarly, D2 (page 1, paragraph 1; claims 1-4; examples 1-91) and D3 (page 1, paragraph 1; claim 1-6, examples 1-40) disclose substituted pyrrolo-isoquinolines with a structure differing from compounds of the present application

- in that they fall under the provisos of claims 1, 2 with R5 being hydrogen or
- in that R5 is different from hydrogen (claims 3, 4, 6) and/or R8 is cyano (claims 3, 4, 8) or
- in that R2 is a halogen atom (several compounds in claim 7).

The PDE10 inhibitory activity of these compounds is also disclosed.

The problem underlying the current application can thus be formulated as providing alternative compounds with PDE10 inhibitory activity (which can e.g. be used to treat cancer). A skilled medicinal chemist would inevitably try to modify the substituents on the basic pyrrolo-isoquinoline structure and use these compounds as PDE10 inhibitors. Thus, there is no inventive step in the sense of Article 33(3) PCT present in the application over D1-D3.
